OUR TRADING POLICY

The Argos prices shown in this catalogue are generally compared with Recommended or Suggested Retail prices provided by our suppliers. Prices stated in this catalogue were established during May 1988 and already include VAT. However, in the event of changes in the VAT rate, or for any other reason beyond our control, we may have to make adjustments, so please check the Reference Catalogue in your Argos Store. All sizes, weight and capacities are approximate. Some descriptions may vary if a supplier has changed or altered their specifications after the catalogue has been printed. This catalogue, effective from 1st August 1988, supersedes all previous catalogues or brochures and remains in effect until further notice. Information is compiled with all possible care, but the publishers do not hold themselves responsible for errors or omissions.

Our suppliers adopt a policy of continuous improvement. Hence there may be during the catalogue, minor variations in models, specifications and colours.

All quartz watches are dependent on batteries for their power source. Accordingly, customers returning watches with expired batteries will be charged for the fitting of replacements.

Watches that are designated splash proof are suitable for wearing whilst water is being splashed but NOT under any pressure i.e. swimming and showering.

Watches that are designated water resistant have been tested to 50 metres static water pressure unless otherwise stated. These watches are suitable for wearing whilst swimming.

CAR COMBINATIONS. There are two different standard sizes of car combination now generally available and these differ in size and method of fitting. DIN E - latest standard design to easily fit in almost all cars made since approximately 1983. Whilst DIN E can be fitted to most ordinary cars, some trimming of the dashboard aperture may be necessary to accept the greater height. DIN D - slightly smaller than DIN E and will fit almost every model of car but may require simple adapter plate obtainable from car accessory stores on post 1983 cars. If in doubt refer to vehicle specification manual or vehicle manufacturer.

To ensure continued high sound quality, clean tape heads regularly. Please see our audio care products on page 253.

Now you can choose telephone products in the same way as you choose all your other household items. You buy your telephones outright and you only pay rental on the exchange line.

All Argos telephones are fully approved for use with British Telecom systems. They plug straight into the new style B.T. jack-socket.

What if you don't have the new style British Telecom jack-socket? Simply telephone your local B.T. sales office for information on how they can convert your existing connection point.

The number of telephones you can connect to a line is determined by the "Ring Equivalent Number" (REN) of each telephone you wish to connect. The maximum REN for a B.T. line is 4. This means for example, that a maximum of 4 telephones each with a REN of 1 could be connected to the same line.

Remember, when you buy your phone, you only pay rental on the exchange line.
